DESCRIPTION		TOTAL
Creation and Collaboration with iPads Description The successful integration of technology into the classroom is dependent upon the ability of teachers to transform their content area curriculum into hands-on, digital learning opportunities. iPads are an ideal tool for students to explore ideas and engage in learning activities. During this workshop, participants will build a series of activities with various apps and tools that they can use with their students. Each participant will leave this workshop with the skills to facilitate an interactive classroom filled with engaged learners. Learner Outcomes Prerequisites		Curriculum Integration with iPads Description The successful integration of technology into the classroom is dependent upon the ability of teachers to transform their content area curriculum into hands-on, digital learning opportunities. The iPads are an ideal tool for students to explore ideas and engage in learning activities. This workshop focuses on individual content areas and provides teachers with interactive lesson ideas that they can use in their classes. Participants are guided through effective strategies of iPad integration, lesson planning, and classroom management. Apps and Web 2.0 tools will be explored to help teachers create an interactive classroom filled with engaged learners. Learner Outcomes Prerequisites
